## INTRODUCING PREFABRICATED SOLUTIONS: ENHANCING EFFICIENCY & PRODUCTIVITY

[eltauk.com](http://eltauk.com)

### Streamline Installation Process

Installing individual components on-site can be a cumbersome task. It requires ample storage and working space, leading to congestion and Occupational Health and Safety (OH&S) issues. The collection and assembly of various parts can also be time-consuming, causing delays in your project timeline. With Prefab Solutions by Elta, these challenges are a thing of the past.

### Superior Quality, Timely Delivery

Our Prefabricated unit is built to the highest quality standards within a controlled factory environment. This guarantees a product that is reliable, durable, and ready on time. By eliminating the need for on-site assembly, you can ensure a seamless installation process and enjoy peace of mind knowing that your project will stay on schedule.

### Boost On-Site Productivity

The simplicity of Prefab Solutions greatly improves on-site productivity. Instead of spending valuable time collecting and assembling components, our assembly can be easily lifted and mounted into position. This streamlined process allows your team to focus on other critical tasks, saving you time, effort, and resources.

### Control Labour Costs

Labour costs can quickly add up when dealing with complex on-site installations. Our Prefab Solutions helps you control these expenses by reducing the amount of time and effort required for installation. With fewer man-hours spent on assembly, you can optimise your workforce and allocate resources more efficiently.

### Eliminate Delays

Gone are the days of waiting for single components to be delivered to the site. With Prefab Solutions, all necessary components are packaged together, ensuring a hassle-free delivery.

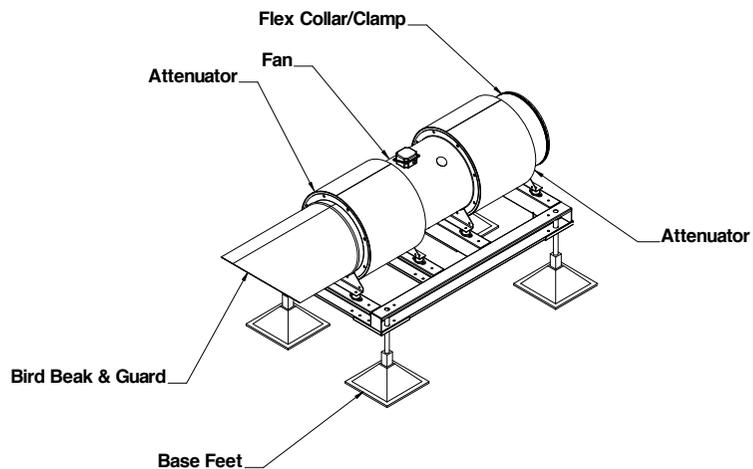

**One delivery** including the Fan, Mounts, Frame, Flexible Connectors and Mount for control and panels. **All From Elta.**

### Health and Safety Compliance

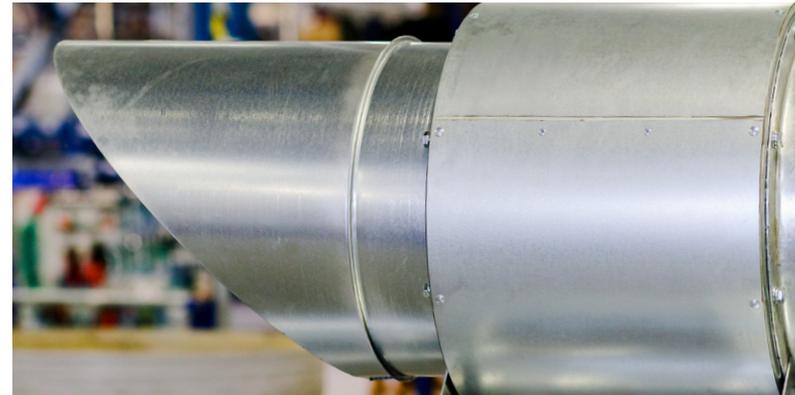

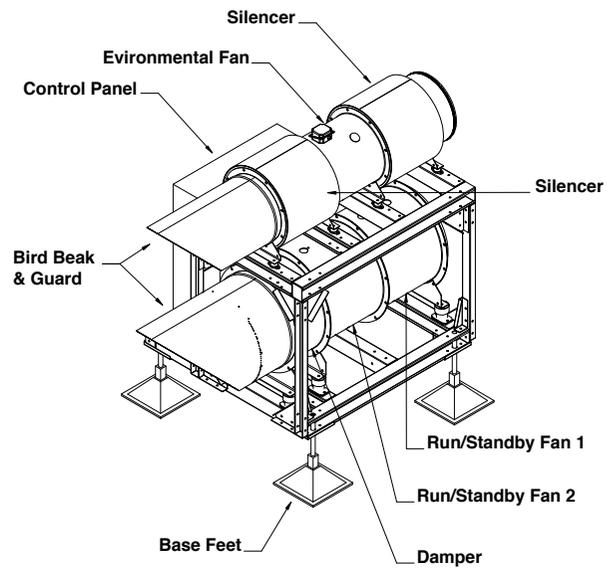

By having one single delivery, the health and safety risks from multiple crane lifts are reduced dramatically. Not only is it quicker and easier for all parties, it's the safest option for site workers.

**Don't let installation challenges hinder your progress. Choose Prefab Solutions and experience improved efficiency, enhanced productivity, and simplified installation. Contact Elta today to learn more about this game-changing solution.**

Single Fan Prefabricated Solution

**Configuration Example**  
Dual Fan Prefabricated Solution

**Noise Control**

We can manufacture and provide all acoustic components. Using our fan selection program, noise performance data is included from the initial stages. This data is supplied to simplify the process for specifiers and contractors, eliminating the need to re-select or re-calculate these measurements separately. Our Fan Selection Program can be downloaded from [eltauk.com](http://eltauk.com)
