2 - HAZARDS IDENTIFICATION

2.1 Classification of the substance or mixture

Classification according to 67/548/EEC or 1999/45/EEC as amended O, C, N, R8, R34, R20/21/22

Classification in accordance to EC 1272/2008 as amended

PHYSICAL HAZARDS		
Organic Peroxide	Type F	H242 Heating may cause fire
Corrosive to metals	Category 1	H290 May be corrosive to metals
HEALTH HAZARDS		
Acute Toxicity Dermal	Category 4	H312 Harmful in contact with skin
Acute Toxicity Inhalation	Category 4	H332 Harmful if inhaled
Acute Toxicity Oral	Category 4	H302 Harmful if swallowed
Eye Damage	Category 1	H318 Causes serious eye damage
Skin Corrosive	Category 1A	H314 Causes severe skin burns and eye damage
Specific Target Organ Toxicity		
Single Exposure	Category 3	H335 May cause respiratory irritation
ENVIRONMENTAL HAZARDS		
Aquatic Chronic Toxicity	Category 1	H410 Very toxic to aquatic life with long lasting effects

Hazard summary

Physical hazards

Heating may cause fire. May be corrosive to metals. **Health hazards** Harmful in contact with skin. Harmful if inhaled. Harmful if swallowed. Causes severe skin burns and eye damage. May cause respiratory irritation

Environmental hazards

Very toxic to aquatic life with long lasting effects

Specific hazards

Corrosive to the respiratory tract.

Main symptoms

Harmful in contact with skin. Symptoms may include discomfort, redness, swelling. Harmful if inhaled. Symptoms may include nausea and discomfort to the upper respiratory tract. Harmful if swallowed. Symptoms may include nausea and discomfort. Burning pain and severe corrosive skin damage. Rash. Causes serious eye damage. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result.

2.2 Label elements Label in accordance with EC 1272/2008 as amended

PERACETIC ACID; HYDROGEN PEROXIDE SOLUTION; ACETIC ACID

Hazard statements

- H242 Heating may cause fire
- H290 May be corrosive to metals
- H312 Harmful in contact with skin
- H332 Harmful if inhaled
- H302 Harmful if swallowed
- H314 Causes severe skin burns and eye damage
- H335 May cause respiratory irritation
- H410 Very toxic to aquatic life with long lasting effects

Precautionary statements

Prevention

- P210 Keep away from heat/sparks/open flames/hot surfaces. No smoking
- P234 Keep only in original container
- P273 Avoid release to the environment
- P280 Wear protected gloves/protective clothing/eye protection/face protection.

Response

- P302+352 IF ON SKIN: Wash with plenty of water/soap.
- P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
- Storage
- P405 Store Locked up.
- Disposal

P501 Dispose of contents/container in accordance with local regulations.

Supplemental label information

EUH071 Corrosive to the respiratory tract.

2.3 Other hazards

Risk of decomposition in contact with incompatible substances, impurities, metals, alkalis, reducing agents.

4 - FIRST AID MEASURES

O, C, Xn, R8, R35, R20/22,

General Information

First aiders should wear suitable protective clothing.

4.1 Description of first aid measures

Inhalation

Move to fresh air. Call a physician if symptoms develop or persist. Ingestion

Call a physician or poison control centre immediately. Rinse mouth. Never give anything by mouth to a victim who is unconscious or is having convulsions. Do not induce vomiting. If vomiting occurs, keep head low so that stomach content doesn't get into the lungs.

Skin contact

Remove contaminated clothing immediately and wash skin with soap and water. Call a physician or poison control centre immediately. Chemical burns must be treated by a physician. Wash contaminated clothing before reuse..

Eye contact

Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Call a physician or poison control centre immediately.

4.2 Most important symptoms and effects, both acute and delayed

Burning and discomfort. Corrosive damage to the eyes, skin, nose, throat or gastrointestinal tract.**4.3** Indication of any immediate medical attention and special treatment needed

Rinse eye immediately with sterile saline solution.

Seek medical attention in case of ingestion, inhalation or contact with eyes.

The initial focus is on the local action, characterised by quickly progressing deep tissue damage. In the eye, caustic/irritating and harmful liquids cause, depending on the intensity of the exposure, various levels of irritation, destruction and ablation of the epithelium of the conjunctiva and corneal clouding, oedema and ulcerations Danger! Possible loss of eyesight! Superficial irritations and damage to ulcerations and scarring develop on the skin. After accidental absorption in the body, the pathology and clinical findings are dependent on the kinetics of the substance (quantity of absorbed substance, the absorption time, and the effectiveness of early elimination measures (first aid/excretion – metabolism) A specific action of the substance is unknown In case of substances with high water solubility, irritations up to formation of necrosis in the upper respiratory tract may result after inhalation of caustic/irritating aerosols and mists. The initial focus is on the local action: Signs of irritation of the respiratory tract such as coughing, burning behind the sternum, tears, burning in the eyes or nose There is risk of pulmonary oedema!

5 - FIRE FIGHTING MEASURES

General Fire Hazards

5.1. Extinguishing media

 SUITABLE EXTINGUISHING MEDIA
 Water spray, Dry powder, foam.
 UNSUITABLE EXTINGUISHING MEDIA
 None

 5.2. Special hazards arising from the substance or mixture

 UNUSUAL FIRE & EXPLOSION HAZARDS
 In case of fire toxic gases may be released. (COx, NOx, HCl).
 SPECIFIC HAZARDS
 None noted.

 5.3. Advice for fire-fighters

SPECIAL FIRE FIGHTING PROCEDURES Collect fire extinguishing water separately, do not allow to enter drains. Exceptionally large spillages should be notified to the appropriate authorities. PROTECTIVE EQUIPMENT FOR FIRE-FIGTHERS Wear self-contained breathing apparatus.

6 - ACCIDENTAL RELEASE MEASURES

6.1. Personal precautions, protective equipment and emergency procedures

Keep unnecessary people away. Wear protective clothing as described in Section 8 of this safety data sheet. Follow precautions for safe handling described in this safety data sheet. Ensure suitable personal protection (including respiratory protection) during removal of spillages in a confined area.

6.2. Environmental precautions Do not let product enter drains. Discharge into the environment must be avoided. Appropriate authorities should be notified in case of contamination of sewerage or surface water.

6.3. Methods and material for containment and cleaning up

Prevent further leakage or spillage if safe to do so. If possible contain the spillage with adsorbent material, place in a suitable container and dispose of as described in section 13 of this safety data sheet.

6.4. Reference to other sections Personal protection –section 8. Disposal considerations –Section 13.

7 - HANDLING AND STORAGE

7.1 Precautions for safe handling

Ensure good ventilation when using this product, avoid inhalation of vapours and spray. Handle with care and avoid spilling, skin and eye contact. Do not handle broken packages without protective equipment. Keep away from heat, sparks and open flame. Do not eat, drink or smoke when using the product. Observe good chemical hygiene practices. Container must be kept tightly closed. Protect against direct heat and sunlight. Follow instructions before use.

7.2 Conditions for safe storage, including any incompatibilities Store in tightly closed original container in a dry, cool and well-ventilated place. Keep in original container

7.3 Specific end use(s) Disinfectant

8 - EXPOSURE CONTROLS / PERSONAL PROTECTION

8.2 Exposure controls

Appropriate Engineering controls

No specific engineering measures are noted except that this product should be used in a well ventilated area.

Individual protection measures, such as personal protective equipment

In case of splashing wear suitable protective equipment.

General information

Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday

Respiratory equipment

Where risk assessment shows air-purifying respirators are appropriate use a respirator with multi-purpose combination (US) or type ABEK (EN 14387) respirator.

Hand protection

The selected protective gloves have to satisfy the specifications of EU Directive 89/686/EEC and the standard EN 374 derived from it.

Full contact Material: Nitrile rubber Minimum layer thickness: 0.6 mm Break through time: >480 min

Splash contact Material: Nitrile rubber Minimum layer thickness: 0.2 mm Break through time: >35 min

If used in solution, or mixed with other substances, and under conditions which differ from EN 374, contact the supplier of the CE approved gloves. This recommendation is advisory only and must be evaluated by an Industrial Hygienist familiar with the specific situation of anticipated use by our customers. It should not be construed as offering an approval for any specific use scenario.

Eye protection

In case of splashing, wear safety goggles or face shield.

Other protection

Wear appropriate clothing to prevent any possibility of liquid contact and repeated or prolonged vapour contact.

Hygiene measures

DO NOT SMOKE IN WORK AREA! Wash at the end of each work shift and before eating, smoking and using the toilet. Promptly remove any clothing that becomes contaminated. Wash promptly with soap

& water if skin becomes contaminated. Use appropriate skin cream to prevent drying of skin. When using do not eat, drink or smoke **Environmental exposure controls** Do not discharge into the watercourse or drains

9 - PHYSICAL AND CHEMICAL PROPERTIES

9.1. Information on basic physical and chemical properties

Appearance	
Physical State:	Liquid
Form:	Solution
Colour:	Colourless
Odour:	Stinging

pН

ca. 0.3

9.2. Other information

Not known

10 - STABILITY AND REACTIVITY

10.1	Reactivity
	Not expected under normal conditions of use
10.2	Chemical stability
	Stable under normal temperature conditions
10.3	Possibility of hazardous reactions
	Not expected under normal conditions of use
10.4	Conditions to avoid
	Avoid exposure to high temperatures or direct sunlight
10.5	Incompatible materials
	Materials to avoid -strong acids or alkalis. Oxidising agents.
10.6	Hazardous decomposition products

None, see section 5 for decomposition products under fire conditions

11 - TOXICOLOGICAL INFORMATION

General information

Information on likely routes of exposure

Inhalation

Inhalation of vapours/aerosols can lead to irritation of the respiratory tract and cause inflammation of the respiratory tract and pulmonary oedema. Symptoms may occur with delay

Skin contact

Causes caustic burns. With increasing contact length, local erythema or extreme irritation (whitening) up to blistering (caustic burn) can occur

Eye contact

Extreme irritation up to cauterisation. Can cause severe conjunctivitis, cornea damage or irreversible eye damage. Symptoms may occur with delay

Ingestion

Swallowing can lead to bleeding of the mucosa of the mouth, oesophagus and stomach. The rapid release of oxygen can cause distension and bleeding of the mucosa in the stomach and lead to severe damage of the internal organs, especially in the event of greater intake of the product

Symptoms

Harmful in contact with skin. Symptoms may include discomfort, redness, swelling. Harmful if inhaled. Symptoms may include nausea and discomfort to the upper respiratory tract. Harmful if swallowed. Symptoms may include nausea and discomfort. Burning pain and severe corrosive skin damage. Rash. Causes serious eye damage. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result.

12.4 Mobility in soil

No data available

- **12.5 Results of PBT and vPvB assessment** No data available
- 12.6 Other adverse effects Not known

13 - DISPOSAL CONSIDERATIONS

13.1 Waste treatment methods

Dispose of waste and residues in accordance with local authority requirements **Residual waste** Dispose of waste and residues in accordance with local authority requirements **Contaminated packaging** Dispose of as unused product. **EU Waste Code** 02-01-08 **Disposal methods/information** Wear protective equipment as outlined in section 8 of this safety data sheet when handling this product contaminated materials and packaging. **Special precautions** Not noted.

14 - TRANSPORT INFORMATION

Road Transport Notes

14.7 Transport in bulk according to Annex II of MARPOL73/78 and the IBC Code

Further information	
Limited quantities:	1L
Expected quantities:	E2
Transport Category (Tunnel Restriction Code):	2 (E)
Hazard Identification Number:	58

15 - REGULATORY INFORMATION

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

Other regulations The product is classified and labelled in accordance with EC directives or respective national laws. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006.

15.2 Chemical Safety Assessment

National regulations Young people under 18 years old are not allowed to work with this product according to the EU Directive 94/33/EC on the protection of young people at work. Follow national regulation for work with chemical agents.

15.2 Chemical safety assessment

No Chemical Safety Assessment has been carried out.

16 - OTHER INFORMATION

List of abbreviations

CO Carbon Monoxide NO Nitrogen Oxide HCL Hydrochloric acid TWA Time weighted average STEL Short Term exposure limit DW Dry weight

References

Information on evaluation method leading to the classification of mixture

The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.

Full text of any statements or R-phrases and H-statements under Sections 2 to 15 O Oxidising C Corrosive Xn Harmful N Dangerous to the environment R8 Contact with combustible material may cause fire R10 Flammable R20/21/22 Harmful by inhalation, in contact with skin and if swallowed R20/22 Harmful by inhalation and if swallowed R34 R35 Causes severe burns R50 Very toxic to aquatic organisms H226 Flammable liquid and vapour H242 Heating may cause fire H271 May cause fire or explosion; strong oxidiser H290 May be corrosive to metals H301 Toxic if swallowed H302 Harmful if swallowed H312 Harmful in contact with skin

H314 Causes severe skin burns and eye damage H311 Toxic in contact with skin H332 Harmful if inhaled H335 May cause respiratory irritation H400 Very toxic to aquatic life H410 Very toxic to aquatic life with long lasting effects H412 Harmful to aquatic life with long lasting effects P210 Keep away from heat/sparks/open flames/hot surfaces. No smoking P234 Keep only in original container P273 Avoid release to the environment P280 Wear protected gloves/protective clothing/eye protection/face protection. P302+352 IF ON SKIN: Wash with plenty of water/soap. P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. P405 Store Locked up. P501 Dispose of contents/container in accordance with local regulations. EUH071 Corrosive to the respiratory tract.
