

Roof Mounted Chimney Fan

## **AGRI-JET HXRU**

### Product Overview

The Agri-Jet Roof Mounted chimney is a high-velocity jet extraction unit for on or off-ridge installations, built to your specification. The design of the inlet ensures that it operates at high efficiency by maximising airflow and operating at low back pressure minimising operating costs.

Stale air is expelled through the cowl to a height of approximately 60 feet, ensuring that any dust, moisture, ammonia and smells are dissipated as they leave the building.

- Three sizes 630mm, 710mm, 800mm
- High efficiency fan easily accessible for cleaning and maintenance
- Minimal back pressure ensures maximum fan efficiency
- High velocity exhaust jet of approximately 60 feet ensures no roof dust deposit
- Plastic thermal barrier trunk reduces noise levels and in-house condensation
- Available with Light Baffle to reduce light levels through the unit to 0.1-0.15 lux
- Supplied as ready-assembled units for on-ridge or off-ridge installation
- Backdraught shutters can be opened using an optional cable system as a fail safe contingency
- Can be coloured to suit local planning requirements, at additional cost
